What makes Merrock different?

Superior spare parts & raw materials

Merrock chooses superior & branded spare parts & raw materials.

Motor – SIEMENS/WONDER/JOVAS.

Inverter – VEICHI/SINOVO.

Bearings - NSK.

Superior processing methods

CNC machines, for processing the gears and gear boxes.

Laser cutting machines, for processing the metal frames of the machines.

Strict Quality Control

Every machine will be tested before&after assembling to make sure it runs smoothly and the gear box is well sealed.

Gear boxes and gear steel will be left alone for nearly half a year to relief the inner stress to make sure the gear box could be more stable and no easy to deform.
